

Problem statement - The new and coming generations of India have little to no knowledge about the history and sacrifices of the heroes of our country hence we created a website and a chrome extension to help create awareness to them.

Description - To pay tribute and spread the awareness about our former Chief of Defense as little did the generation know about one the man who sacrificed his life living away from his family in every occasion to protect his COUNTRY, the truth is that we exist because people like them exist, the fact is that they their hand on the finger on the trigger which is why we can breathe freely

Requirement - Computer device, Web browser

Technologies - HTML, CSS, Json Library, Git/GitHub, Chrome extension

Challenges Faced:

- 1) Used the wrong manifest-version in manifest.json file.
- 2) Used incorrect pixel density for the chrome extension logo.
- 3) Couldn't initially figure smooth-scrolling effect in css.

Scope - this will educate the oblivious youth about the sacrifice of our hero
